4.8.3 Transaction Processing for Delete

The Delete Transaction provides the user with the capability to delete case and item information for all active disposal cases. NSMS Materials Inventory property can not be deleted in this process. Delete processing for NSMS is completed using the Utilized by Generating NASA Center (T05). If the received quantity of NSMS items is zero, it is deleted using the Receipt process (T02). Refer to section 4.8.4.

NOTE: When navigating through NPDMS, the Fastpath name (limited to eight characters) is displayed on the fourth line starting at the center of the screen.

NOTE: The screen field data areas in the UOG are shown with either blanks, lines, or asterisks. Field data areas that are blank are not modifiable and display data if it is available. Field data areas with lines are modifiable and may be optional unless conditionally tied with other screen fields. If the field data area is tied to another field, NPDMS displays an appropriate warning or error message if an entry is required. Field data areas with asterisks require entry of data and may be modified if pre-filled by the system.

INPUT DATA

- From the NPDMS MAIN MENU (NDO000MB), type **5** at Enter Selection to access the TRANSACTION MENU (ND5000MA).
- Press **<Enter>**.

The TRANSACTION MENU (ND5000MA) is displayed.

```
                        NASA PROPERTY DISPOSAL MANAGEMENT SYSTEM       03/01/01

      HELP  LOPF  PREV  RVW   CNCL                    CLEAR             EXIT
```

INPUT DATA

- Enter Selection input value = **3**
- Prop Case No (Mandatory)
- Item Id (Optional)
- Press **<Enter>**.

Action is performed based on the input on the TRANSACTION MENU (ND5000MA) screen.

4.8.3.1 Controlled (NEMS-tagged) Delete

This process allows the user to delete Controlled (NEMS-tagged) property cases.

NOTE: When navigating through NPDMS, the Fastpath name (limited to eight characters) is displayed on the fourth line starting at the center of the screen.

NOTE: The screen field data areas in the UOG are shown with either blanks, lines, or asterisks. Field data areas that are blank are not modifiable and display data if it is available. Field data areas with lines are modifiable and may be optional unless conditionally tied with other screen fields. If the field data area is tied to another field, NPDMS displays an appropriate warning or error message if an entry is required. Field data areas with asterisks require entry of data and may be modified if pre-filled by the system.

- From the TRANSACTION MENU (ND5000MA), type **3** at Enter Selection, Prop Case No, and optionally the Item Id to access the CONTROLLED PROPERTY DELETE screen (ND4310MA).
- Press **<Enter>**. NPDMS then verifies that the entered Prop Case No is present on the NPDMS Case File and displays it on the CONTROLLED PROPERTY DELETE (ND4310MA) screen, and places the cursor at the first input field.

Appropriate data fields are populated and displayed by the system.

```

INPUT DATA

- Property Transaction Description

- Enter 'C' to Cancel input value = **C** or **blank**

- Press **<Enter>**. If **C** to Cancel entered, NPDMS displays the CONTROLLED PROPERTY DELETE screen (ND4310MA).

- NPDMS updates the case record and the associated transaction record(s), then they are moved to the Case History File and the Transaction History File, respectively. The case record and the associated transaction records are deleted from the Case and Transaction Files. The following transactions are generated: E03 Transaction, X15 Transaction to identify NEMS Equipment data, and NP/NEMS Interface ERN. NPDMS displays the message *'(Number Record(s)) Deleted - ERN = N9 Thru N9'* on the CONTROLLED PROPERTY DELETE (ND4310MA) screen.

4.8.3.2 Non-Controlled Delete

This process allows the user to delete Non-Controlled property single cases. NSMS Materials Inventory property can not be deleted in this process. Delete processing for NSMS is completed using the Utilized by Generating NASA Center (T05). If the received quantity of NSMS items is zero, it is deleted using the Receipt process (T02). Refer to section 4.8.4.

NOTE: When navigating through NPDMS, the Fastpath name (limited to eight characters) is displayed on the fourth line starting at the center of the screen.

NOTE: The screen field data areas in the UOG are shown with either blanks, lines, or asterisks. Field data areas that are blank are not modifiable and display data if it is available. Field data areas with lines are modifiable and may be optional unless conditionally tied with other screen fields. If the field data area is tied to another field, NPDMS displays an appropriate warning or error message if an entry is required. Field data areas with asterisks require entry of data and may be modified if pre-filled by the system.

- From the TRANSACTION MENU (ND5000MA), type **3** at Enter Selection, Prop Case No and optionally the Item Id to access the NON-CONTROLLED PROPERTY DELETE screen (ND4310MA).

- Press **<Enter>**. NPDMS then verifies that the entered Prop Case No is present on the NPDMS Case File and displays it on the NON-CONTROLLED PROPERTY DELETE (ND4310MA) screen, and places the cursor at the first input field.

Appropriate data fields are populated and displayed by the system.

INPUT DATA

- Property Transaction Description

- Enter 'C' to Cancel input value = **C** or **blank**

- Press **<Enter>**. If **C** to Cancel entered, NPDMS displays the NON-CONTROLLED PROPERTY DELETE screen (ND4310MA).

- NPDMS updates the case record and the associated transaction record(s), then they are moved to the Case History File and the Transaction History File, respectively. The case record and the associated transaction records are deleted from the Case and Transaction Files. An E03 Transaction is generated. NPDMS displays the message *'(Number Record(s)) Deleted - ERN = N9 Thru N9'* on the NON-CONTROLLED PROPERTY DELETE (ND4310MA) screen.

4.8.3.3 Component System Item Delete

This process allows the user to Delete Component System Items from a Component System Case.

NOTE: When navigating through NPDMS, the Fastpath name (limited to eight characters) is displayed on the fourth line starting at the center of the screen.

NOTE: The screen field data areas in the UOG are shown with either blanks, lines, or asterisks. Field data areas that are blank are not modifiable and display data if it is available. Field data areas with lines are modifiable and may be optional unless conditionally tied with other screen fields. If the field data area is tied to another field, NPDMS displays an appropriate warning or error message if an entry is required. Field data areas with asterisks require entry of data and may be modified if pre-filled by the system.

- From the TRANSACTION MENU (ND5000MA), type **3** at Enter Selection and enter the Prop Case No and optionally the Item Id.

- Press **<Enter>**.

- If Item Id equals **blank**, NPDMS displays the COMPONENT SYSTEM ITEM SELECTION screen (ND4110MM). This allows the user to select the appropriate component system item.

```

INPUT DATA

- Property Transaction Description

- Enter 'C' to Cancel input value = **C** or **blank**

- Press **<Enter>**. If **C** to Cancel entered, NPDMS displays the COMPONENT SYSTEM ITEM DELETE screen (ND4310MA).

- NPDMS updates the case record and the associated transaction record(s), then they are moved to the Case History File and the Transaction History File, respectively. The case record and the associated transaction records are deleted from the Case and Transaction Files. Depending on whether the case record is Non-Controlled or Controlled (NEMS-tagged) Property the following transactions are generated: an E03 Transaction for Non-Controlled and Controlled Property; a X15 Transaction and NP/NEMS Interface ERN for Controlled Property. NPDMS displays the message *'N Record(s) Deleted - ERN = N9 Thru N9'* on the PROPERTY DELETE (ND4310MA) screen.

4.8.3.4 Component System Case Delete

This process allows the user to Delete Component System Cases.

NOTE: When navigating through NPDMS, the Fastpath name (limited to eight characters) is displayed on the fourth line starting at the center of the screen.

NOTE: The screen field data areas in the UOG are shown with either blanks, lines, or asterisks. Field data areas that are blank are not modifiable and display data if it is available. Field data areas with lines are modifiable and may be optional unless conditionally tied with other screen fields. If the field data area is tied to another field, NPDMS displays an appropriate warning or error message if an entry is required. Field data areas with asterisks require entry of data and may be modified if pre-filled by the system.

NOTE: Since records are retired online from active (Case and Transaction) files to history (Case and Transaction) files, this process may create a performance problem or impose time constraints for completing this function. The user may have to wait a little longer than normal before the final success message appears on the screen. There is a direct relationship between the number of records involved in the processing and the time it takes to complete the process, i.e., the more records the longer time it takes to complete the processing.

- From the TRANSACTION MENU (ND5000MA), type **3** at Enter Selection and enter the Prop Case No and optionally the Item Id.

- Press **<Enter>**.

- If Item Id equals **blank**, NPDMS displays the COMPONENT SYSTEM ITEM SELECTION screen (ND4110MM). This allows the user to select the appropriate component system item or the entire case.
