

4.8.9 Transaction Processing For Converting Single Case To Component Item

If an item was inadvertently handled as a single-case record rather than part of a Component System, the Convert Case to Component System function allows the online conversion of an existing single-case record to a component system item. The Component System Property Case Number and the next available Property Item Identifier are assigned to the converted item.

The data is verified to ensure the following: the Property Case Number entered is a single case, the case is not NSMS property, the single case and the component system agree in transferring to a DRMO or reporting to the same GSA Region (i.e., all record items must be transferred to a DRMO or all are reported to the same GSA Region). The Component Property Case Number is assigned by the system to this converted item, along with the next Item Id.

If no Component Property Case Number is entered or if entered and no record was found, the user is given the option to create a new component system from two or more existing single case records or to cancel the conversion process. This conversion process allows conversion of up to twenty-eight single case records to a component system during a single conversion session.

NOTE: The initiation of this conversion process may create a performance problem or impose time constraints for completing this function. The user may have to wait a little longer than normal before the final success message appears on the screen. There is a direct relationship between the number of records involved in the processing and the time it takes to complete the process, i.e., the more records the longer time it takes to complete the processing. Processing may involve changing the component system level indicators (i.e., component system hazardous materials indicator, precious metals indicator, component system demilitarization code, and component system artifact indicator).

NOTE: When navigating through NPDMS, the Fastpath name (limited to eight characters) is displayed on the fourth line starting at the center of the screen.

NOTE: The screen field data areas in the UOG are shown with either blanks, lines, or asterisks. Field data areas that are blank are not modifiable and display data if it is available. Field data areas with lines are modifiable and may be optional unless conditionally tied with other screen fields. If the field data area is tied to another field, NPDMS displays an appropriate warning or error message if an entry is required. Field data areas with asterisks require entry of data and may be modified if pre-filled by the system.

- From the NPDMS MAIN MENU (NDO000MB) type 5 at Enter Selection to access the TRANSACTION MENU (ND5000MA).
- Press <Enter>.

The TRANSACTION MENU (ND5000MA) is displayed.

```

ND5000MA / ND5000PA      NASA PROPERTY DISPOSAL MANAGEMENT SYSTEM      03/01/01
                          TRANSACTION MENU                               14: 29: 04
                          TX                                           MSXXX

                          Selections:

1  Add                    8  Reversal
2  Change                 9  Convert Case to Component
3  Delete                 10 Convert Component to Case
4  Receipt                11 Enter SRD and GSA Control No
5  Sales                  ?  In any field for Help
6  Exchange (Trade-In)   .  Exit Transaction Process
7  Freezes and Dispositions
   (Includes Scrap and Surveys)

Enter Selection:
Prop Case No:  804101 _____ Item Id:  _____

      HELP  LOPF  PREV  RVW  CNCL                CLEAR                EXIT
  
```

INPUT DATA

- Enter Selection input value = 9
- Prop Case No
- Press <Enter>.

Action is performed based on the input on the TRANSACTION MENU (ND5000MA).

4.8.9.1 Add Item To Component System

This allows the user to convert a Single Case to a Component System Item.

- From the Transaction Menu, type **9** at Enter Selection and the Property Case Number to access the CONVERT CASE TO COMPONENT SYSTEM screen (ND4700MA).
- Press <Enter>. The CONVERT CASE TO COMPONENT SYSTEM screen (ND4700MA) displays either one of two screens, one for Controlled Property or one for Non-Controlled Property.

Appropriate data fields are populated and displayed by the system.

Controlled Property
